**POST-OPERATIVE INSTRUCTIONS FOR THE SEDATION PATIENT**

- Patients may sleep but must be watched for at least six (6) hours after treatment.
- Please escort the patient from the vehicle to the house by supporting them under the arm. Do not let the patient go up or down stairs unescorted.
- Patient may not drive for 24 hours after being sedated and must limit physical activity.
- Give the patient medications only as directed by Dr. Brannen.
- Leave the “Post-operative Instructions” form and any medication easily available for the patient.

**PAIN MANAGEMENT**

Ibuprofen = Advil, Motrin  
—600mg (3 tablets of 200mg) Ibuprofen taken every 6 hours—  
NEVER take more than 3200 mg (16 x 200mg tablets) Ibuprofen in 24 hours.

**AND**

Acetaminophen = Tylenol  
—500-1000 mg Acetaminophen (1-2 tablets of 500mg Tylenol) every 6 hours—  
NEVER take more than 4000 mg (8 x 500mg tablets) Acetaminophen in 24 hours.

\*\*If you have a prescription for Vicodin or Percocet, it will be substituted in place of Acetaminophen\*\*

If you have any questions about this regimen or about the post-operative instructions, please call:
